

Collective Brand Guide

Final redesign v2.0 - approved gold C + people + open book mark

Small steps. Real progress.

This version replaces the older sunrise/ray logo and all progress-bar experiments. The production mark is now a single-color gold symbol built around a wide open C, three people, and an open book base.

Core loop: Discover -> Practice -> Prove -> Get Feedback -> Build Trust -> Contribute

1. Brand Foundation

The brand is warm, calm, useful, trustworthy, beginner-safe, lightly premium, and never performative.

Product concept	Collective is not a normal social media app, course app, or coaching marketplace. It is a place to practice useful growth, submit proof, receive feedback, and earn trust through contribution.
Brand promise	Progress you can build on.
Launch wedge	Confidence, communication, and momentum.
Principles	Real progress over appearance. Practice over passive content. Usefulness over attention. Contribution over clout. Earned trust, not paid trust. AI support, not AI authority.

2. Final Logo System

The mark represents people learning and contributing together, supported by practice and proof.

Primary mark

Mini mark

App icon

Horizontal lockup

- Primary production mark: gold only, transparent background.
- Meaning: open C = Collective; three people = shared practice and contribution; open book = learning, proof, and feedback.
- Use the mini mark in tight UI spaces, bottom sheets, empty states, and small navigation surfaces.
- Use the horizontal lockup for landing pages, documents, pitch materials, and external handoffs.

3. Logo Construction and Rules

Keep the symbol simple enough to recognize at small app sizes.

Construction

- Wide open C underlay: signals Collective without becoming a badge.
- Three people: community and contribution, not influencer culture.
- Open book base: practice, learning, proof, and feedback.
- Negative space: keeps it calm, premium, and readable.

Do

Use gold on cream or white. Keep clear space. Export from SVG. Use mini version under 32px.

Do not

Do not use the old sunrise logo, ray burst, progress-bar mark, random gradients in the app, loud backgrounds, or use the mark as a clout/status badge.

4. Logo Variants Included

Use the production mark by default. Variants exist for specific surfaces.

Primary gold

Default app and brand mark. Use in headers, loading states, empty states, and success states.

White reverse

For dark evergreen, gold, or image backgrounds where gold loses contrast.

Marketing gradient

Optional for promo renders only. Do not use as the production app mark or default UI logo.

Collective

Small steps. Real progress.

Horizontal lockup

Use when the name must be shown next to the mark.

5. Color System

Gold is progress. Cream is safety. Cards stay quiet. Use color with restraint.

	Collective Gold #F2A900	Use with restraint. Maintain contrast for text and action states.
	Collective Gold Bright #FFB000	Use with restraint. Maintain contrast for text and action states.
	Collective Soft #FFF1C7	Use with restraint. Maintain contrast for text and action states.
	Collective Cream #FFF8EE	Use with restraint. Maintain contrast for text and action states.
	Collective Card #FFFDF8	Use with restraint. Maintain contrast for text and action states.
	Collective Text #111111	Use with restraint. Maintain contrast for text and action states.
	Collective Muted #6E6E6E	Use with restraint. Maintain contrast for text and action states.
	Collective Success #22C55E	Use with restraint. Maintain contrast for text and action states.
	Collective Line #EFE7D8	Use with restraint. Maintain contrast for text and action states.
	Deep Evergreen Optional #18382F	Use with restraint. Maintain contrast for text and action states.

6. Typography and UI Shape

Use native system fonts. Do not package proprietary fonts.

Screen background	#FFF8EE warm cream
Cards	#FFFDF8, 18px/dp radius, subtle warm shadow, no heavy borders
Sheets	28px/dp top radius, small centered mini mark, calm title, direct CTA
Buttons	Gold fill for primary actions; tonal cream/gold for secondary actions
Motion	Subtle progress and completion animations. Avoid confetti and pressure.
Typography	Inter/system sans for UI; Georgia/serif option for external wordmark only

7. App Redesign System

Every screen should help a user take a small useful step.

Home	Calm progress dashboard: greeting, today direction, continue practice, submit proof, recent proof, feedback waiting, trust education.
Discover	Meaningful directions instead of endless social feed: Confident Communication, Momentum, Better Feedback, Showing Your Work.
Practice	Focused task, low pressure. Timer/notes if useful. Completion copy: Practice logged. Small steps count.
Proof	Text/image/video/audio/link proof types. Default to Private or Closed group. CTA: Submit proof.
Feedback	Useful feedback structure: What worked, one improvement, try this next. No public ranking.
Trust/Profile	Educational trust signals: completed practices, submitted proof, useful feedback, contribution, reliability. No leaderboard.
Empty states	Use the new mini logo mark and beginner-safe copy. No shame, no viral language.

8. Voice and Product Language

The product should sound like a useful guide, not a hype machine.

Use	Avoid
- Small steps. Real progress. - Choose a direction. Practice one small step. - Show what you practiced. It does not need to be perfect. - Feedback helps you improve. It does not define you. - Trust is earned through practice, proof, useful feedback, and contribution.	- Go viral - Followers - Likes - Influencer - Leaderboard - Crush it - Dominate - Elite - Shame-based streak copy

AI support rule: AI may help users reflect, practice, summarize, and organize feedback. AI should not become the final authority on trust, worth, confidence, skill, or identity.

9. Implementation Handoff

Replace old assets everywhere, then update the theme, components, and screens.

Primary SVG	assets/svg/collective-mark-primary.svg
Mini SVG	assets/svg/collective-mark-mini.svg
Horizontal lockup	assets/svg/collective-logo-horizontal.svg
App icon	assets/svg/collective-app-icon.svg and assets/png/collective-app-icon-1024.png
Tokens	design-tokens/collective_tokens.json and collective_tokens.css
Android	android/ic_collective_mark.xml, colors.xml, CollectiveTokens.kt
Web/PWA	favicon, apple-touch-icon, manifest icons, meta theme color #FFF8EE
Remove	old sunrise/ray logo, progress bar logo, old gradient production mark, likes/followers/viral copy

Next product pass: update app UI with the new logo, then run one full old-asset cleanup pass across public assets, components, docs, Android vectors, manifest files, and PDF handoffs.
